

Press Release

MantisBT for agile software development: agileMantis scrum tool becomes official bug tracker plugin

Much, 24 September 2014 – IT company gadiv's agileMantis scrum tool is upgrading the bug-tracking system MantisBT's data to include the complete set of scrum artefacts and features. MantisBT has now added the tool in its official plugin directory. As a result of this upgrade, the popular bug tracker can now also be used for scrum projects.

MantisBT had so far not offered any features to support agile scrum software development processes. Thanks to this application, adesso AG subsidiary gadiv GmbH has closed this gap. Applying agileMantis, users receive an official MantisBT plugin that allows them to use the bug tracker successfully in scrum.

An overview of the features and benefits of agileMantis with MantisBT:

- -agileMantis upgrades 'Issues' to 'User Stories', which are part of product back-logs. These can now be dragged to 'Sprints' and then broken down into 'Tasks'.
- -Scrum teams can be created from MantisBT users. The relevant assignment of roles such as 'Scrum Master', 'Product Owner', 'Developer' etc. is done within those teams.
- -agileMantis generates an associated sprint backlog with each sprint, where tasks can be processed and progress can be tracked.
- -The tool performs capacity management for each staff member and sprint, which allows for transparent and efficient sprint planning.

agileMantis is an open source plugin that can be upgraded with agileMantisExpert. This licensed version provides even greater convenience and a wider range of functions. In particular, it includes a visual task board that can be easily operated by drag and drop, as well as graphic statistics for burndown, velocity and cost management.

Find agileMantis in the plugin directory of MantisBT:

https://github.com/mantisbt-plugins

A free download of the basic version of agileMantis is available at:

http://sourceforge.net/projects/agilemantis

The expert components can be downloaded from the gadiv site. The license key to activate the expert components can also be ordered on the site. A free test license for the expert components is available at:
